

NGUYEN VAN PHU

Ha Noi, Vietnam · +84 976 914 076 · phu0908204@gmail.com · github.com/phuphu0981 · LinkedIn · phunv.vercel.app

Backend developer with nearly two years of hands-on work in PHP and Go. Currently builds Magento 2 modules, headless WordPress and Go microservices for client projects at Magenest. Writes clear technical documents alongside the code.

EDUCATION

University of Transport Technology (UTT), Ha Noi — 2022 to present

- B.Sc. Information Technology. GPA 3.6 / 4.0 (Excellent).
- Merit scholarship, Excellent grade, in semesters 3, 4 and 6.

WORK EXPERIENCE

Magenest — Backend Developer, Ha Noi — Nov 2025 to present

- **Oroca (Magento 2.4.8, B2B/B2C)**: built a clinic sign-up module with REST and GraphQL APIs, admin grid and email alerts; added VAT invoice details for company buyers; moved product label indexing to a message queue to cut load; added stock limits for bundle, grouped and configurable products; created Vietnamese-friendly URLs with 301 redirects. About 105 commits.
- **AI Cypher (Magento add-on)**: built most of the “frequently bought together” module: cart and order tracking, CSV feed for the AI service, best-seller fallback, scheduled sync with retries, and a dead-letter queue with alerts.
- **Fulbright University Vietnam (headless WordPress)**: co-built the page builder backend with version history, slug locks, rate limits and safe logout; added a translation API and GraphQL data for courses, majors, people and events.
- **ACE Platform (Go microservice)**: built a search service that reads Kafka events into OpenSearch 2.19, with a search and suggest API, a CLI for reindex and failed-message retry, and tests in GitLab CI.
- **Magento extensions**: upgraded Abandoned Cart, Gift Card Plus and Popup to Magento 2.4.8 / PHP 8.4 and replaced the retired Mandrill SDK with Mailchimp Transactional; built a Vietnamese map module supporting Vietmap and Goong.
- **SM Markets (Adobe Commerce + PWA Studio)**: got the legacy storefront running locally and wrote notes on about 200 legacy modules for onboarding.
- **AEON Mall Thanh Hoa (WordPress / Elementor)**: wrote repeatable export and import scripts to move a landing page to UAT and production without code changes.

HQ Group JSC — Backend Developer (Intern to Junior), Ha Noi — Feb 2025 to Oct 2025

- Linked ClickUp to a Laravel KPI dashboard, automating 100% of weekly progress reports.
- Built a payroll module covering base salary and affiliate revenue share, cutting manual work by 80%.
- Built stock-in, stock-out and balance tracking kept in sync across the main warehouse and branches.
- Turned designs into responsive HTML/CSS/JS pages and worked with BA and QA in Scrum sprints.

CoreSys Company — Backend Developer (PHP / Laravel), Ha Noi — Jan 2025

- Built the company website on Laravel MVC (coresyscompany.com).
- Stored and compressed media with the Cloudinary API; set up automatic emails and a content admin page.

SELECTED PROJECTS

- **Preme** (kerrax.com), Sep 2026 to present — Go, Gin, MySQL, Redis, Next.js 16. Shop for digital and AI accounts with a multi-supplier catalog that hides loss-making items, Binance Pay USDT wallet, admin reports and a self-hosted Docker / Nginx / Cloudflare Tunnel setup. 157 commits and 19 planning documents.

- **E-Learning LMS** (e-learningg.click), Mar to May 2026 — Laravel 11, Redis, Python. Course platform split into 7 modules; Python workers transcribe, translate and dub lessons into EN/FR/VI and write quizzes with an LLM; 2FA and PayOS payments.
- **Opaline Gazette**, Aug to Sep 2026 — Go, GraphQL, PostgreSQL, Next.js 16. Headless news site with an RSS crawler and a sitemap for over 50,000 URLs; shipped with a PRD and 11 operating guides.
- **OpenDox** (opendox.vercel.app), Sep 2026 — FastAPI, PaddleOCR, Next.js 15. Document translation with OCR and in-browser PDF tools.
- **learnCode**, Jul to Aug 2026 — Go, Judge0, Next.js 16. LeetCode-style practice site that runs code in a sandbox, with Google login and OTP 2FA.
- **Letter Love**, May 2025 — Laravel, MySQL. Web app that sends personalised letters and greetings by email (code).
